SOLID TIMBER MATTING

Reliable & Durable Matting. Used For Almost All Applications

INDUSTRIES SERVED

- Crane Work
- Temporary Access Roads
- Oil & Drilling
- Pipeline Construction
- Barge & Marine Work
- Events & Construction
- Offshore Operations
- Environmental Remediation
- Transmission Lines
- Logging & Forestry
- Military
- Free Span Bridging
- Bridge Construction
- Heavy Civil
- Heated & Safety Walkways
- Turf Protection
- Waste Removal & Cleanup
- Nuclear, Mining, Hydro,
Solar & Wind
- Utilities

Solid Timber Mats

- ✓ Also known as Crane Mats, Bridge Mats, Digging Mats, Dragline Mats, Construction Mats, Excavation Mats, Pipeline Mats
- ✓ Standard sizes readily available in 8" thickness and 12" thickness.
- ✓ Custom sizes and features such as lifting devices & interlocking fingers are available upon request.

Ask Us About Our

- ✓ New & Used Mat Rental Programs
- ✓ Mat Purchase & Buyback Programs
- ✓ Mat Installation & Removal Services
- ✓ Pipeline Skids, Dunnage, Cribbing, Lagging & Custom Cut Timbers
- ✓ Mat Cleaning, Washing & Waste Removal Programs

Spartan Mat Provides Ground Solutions to Industries Throughout the World

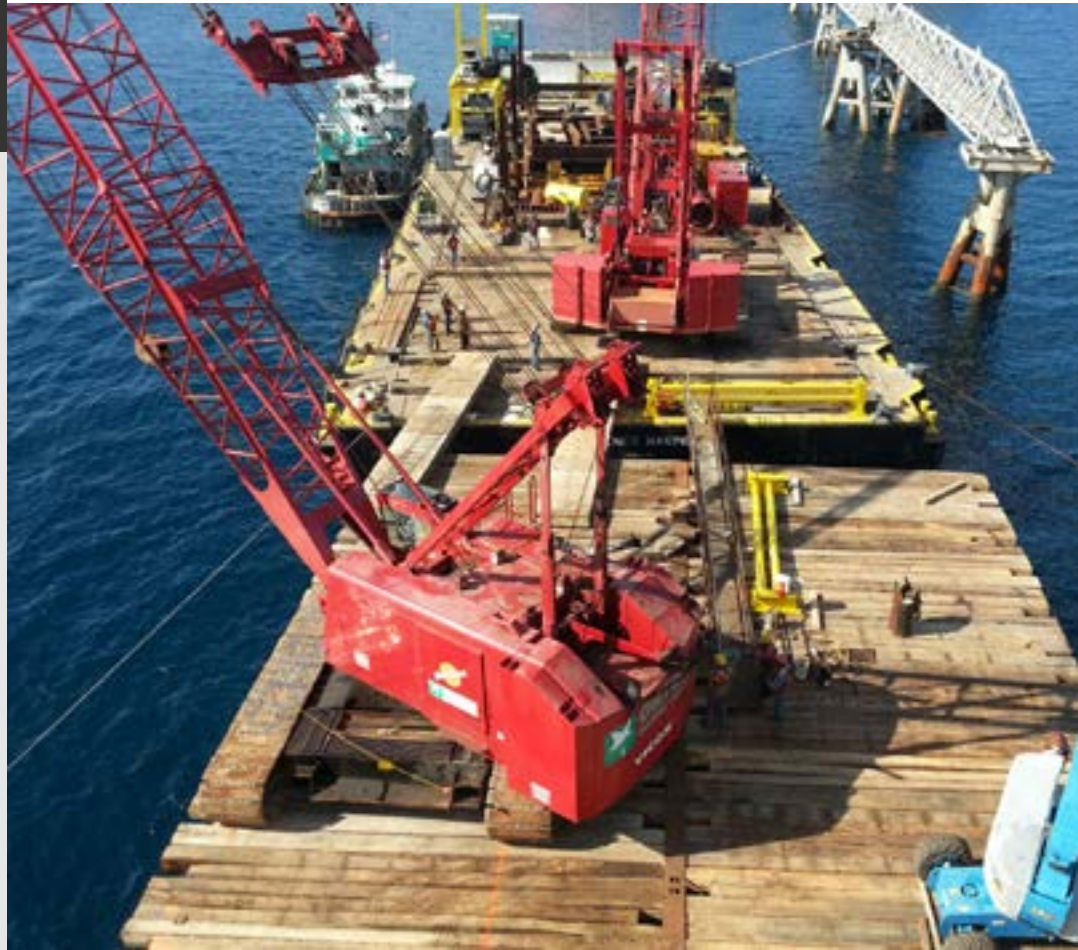

HAVE YOU CONSIDERED COMPOSITE ALTERNATIVES?

Maybe it's time you did. Spartan Mat's legacy has always been helping customers find the right mat, for the right application and at the right price.

BUT...

- Wooden mats rot.
- They don't come with guaranteed engineering values.
- And they're heavy, resulting in high freight and handling costs.

Composite mats NEVER rot, they come with engineering values, and they help save a ton on freight and handling. For these very reasons, the demand for composite matting continues growing exponentially, even at times being required over wooden mats by the government and key players in the industry. In response, Spartan Mat acquired the assets to manufacture composite mats and created a new sister entity—Spartan Composites—in order to support the rapid growth of composite matting as an alternative to traditional wooden mats. **Learn more at www.SpartanComposites.com.**

Benefits of Using Solid Timber Mats

- ✓ Timber mats have been around almost as long as any other type of mat, are tried and true, and are here to stay.
- ✓ Used in almost all matting applications including, but not limited to, temporary road access, pipeline construction, transmission line construction, wind farm construction, oil and gas exploration work, environmental remediation, logging, bridge building and more.
- ✓ Very effective for all types of equipment needing access to job site locations of all varieties.
